Thank you!

Dear EPA Region 10,

The Portland Harbor Superfund site needs an aggressive cleanup that protects people and wildlife for the long-term. In response to your Draft Plan, I feel you need to consider the following:

- ① The overall goal of the Superfund cleanup should be to lift the fish advisory related to toxic pollutants found in the Portland Harbor area of the Willamette River.
- ② At least 1000 acres of the most highly contaminated sediment should be dredged and removed to achieve this goal.
- ③ The Draft Plan contains far too much Monitored Natural Recovery.
- ④ More to say? Add it here: *the river is of central importance to Oregon, Washington & Idaho.*

Please help us clean up the pollution that went on for decades!
